

PRODUCT SPOTLIGHT: ExpertImage Version 7

PRODUCT OVERVIEW: Designed as the next generation of ATG's popular imaging solution, ExpertImage v7 takes imaging to a new level. Completely customizable, firms will now have the ability to tailor enterprise-wide imaging to meet specific needs and requirements. Choose from a variety of predefined templates such as billing, prebills, AP invoices, cash receipts, and AP checks; all integrate directly with your financial system. Or create an entirely new solution to capture any type of image, whether it's integrated with another SQL-based application or used standalone.

TECHNOLOGY: The open system design allows complete control of the user interface. Whether you simply want to rearrange the order of search fields, change terminology (including language localization), even add or remove search fields – it's easily configurable by a local administrator. ExpertImage v7 is a Microsoft .NET application written in C# and based on version 2.0 of the .NET Framework. The application for retrieving images is available as a desktop executable or as a browser application. A separate SQL database is required to store the image references. Image files are stored on any existing file server.

CLIENTS: 98 law firms globally are utilizing ATG's ExpertImage enterprise imaging solution, with an average attorney count nearing 320 per firm. ExpertImage firms include Global 100, AmLaw 100, and AmLaw 200 firms, including a well-balanced mix of international, national, and regional sites in 56 cities and 6 countries. Signature clients include Bricker & Eckler, Clark Wilson, Dewey Ballentine, Ford & Harrison, Holland & Hart, Holme Roberts & Owen, Norton Rose, Sedgwick.

FEATURES & BENEFITS: The application streamlines image management processes, expedites searches and retrievals, manages image access, and improves image retention policies. ExpertImage also allows for the most efficient use of network resources, physical storage space, and firm personnel.

ExpertImage key features:

- ◆ Provides instant, firm-wide access to images
- ◆ Seamlessly integrates with any SQL-based system
- ◆ Enables images to be integrated with workflow applications
- ◆ Makes images available to employees, clients, and third-party systems
- ◆ Supports barcoding and batch scanning

QUOTABLES: "ExpertImage has dramatically reduced the volume of paper files, which in turn has helped save on expensive floor space previously occupied by filing cabinets."

Terri Worthington, Billing and Collections Manager, Holme Roberts & Owen LLP

"ExpertImage helps make accounting personnel much more efficient, speeds up billing and collections processes, and assists management in client discussions."

Kevin Twomey, Financial Analyst, Sedgwick, Detert, Moran & Arnold LLP

"ExpertImage seamlessly integrates with our financial system and rarely requires any technical support from our IT department. The software is intuitive and simple to use, requiring a minimum of training for new personnel."

Mike Gallagher, Director of Information Services, Ford & Harrison LLP

"We are so pleased with the product. Using the system for billing has paid for itself many times - no more sorting, filing, boxing, labeling, moving, retrieving, or re-filing."

Sandy King, Controller, Clark Wilson LLP
